

TENNIS GRAND SLAM CHAMPIONS

Full astrology research appendix | 1986-2026

89 unique champions | 324 singles titles | Men and women | Four Grand Slam tournaments

Extended data appendix modeled on the UFC research format: individual champion records, planetary placements, natal longitudes, selected aspects, title history, grouped statistics, birth-date source register and methodology.

Research status: This is an expanded presentation of the existing consolidated working data, not a new independent validation of every record. Birth times are unknown in the tennis source workbook; noon UTC is a calculation convention. Certain linked sources are generic rather than player-specific, and 2026 tournament results require an independent results audit. Do not treat the PDF as fully verified publication evidence.

Contents

1. Dataset overview and coverage
2. All champions: birth dates and zodiac placements
3. Planetary longitudes (Sun-Pluto)
4. Major aspects: five natal pairings
5. Complete title ledger (324 singles champions)
6. Statistical tables: signs, tours, tournaments, decades and repeat champions
7. Individual birth-date source register
8. Calculation protocol, limitations and audit priorities

1. Coverage and data definitions

Each **champion** appears once in the unique-athlete tables. Each **title** is a separate tournament-year-tour record, so repeat winners appear many times in the title ledger. The scope is the 1986–2026 Grand Slam singles calendar. Australian Open 1986 and Wimbledon 2020 did not award singles titles; the resulting denominator is 324 rather than 328.

The research dataset contains tropical zodiac positions for Sun, Moon, Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto. The aspects section reproduces the five selected pairings stored in the source workbook. No ascendants or houses are inferred.

Measure	Value	Definition
Unique champions	89	Individual players, regardless of titles
Men / women	39 / 50	Unique athletes by tour
Grand Slam titles	324	Each year-tournament-tour championship
Men / women title records	162 / 162	Title-weighted sample
Calendar years	1986–2026	41 years inclusive
Known birth times	—	Unknown is not a verified time

8. Methodology and interpretation

Population: All singles title records in the consolidated working ledger, 1986–2026. No missing Australian Open 1986 or Wimbledon 2020 titles are imputed. Every athlete is counted once in unique-champion analysis; every awarded singles championship is counted once in title-weighted analysis.

Ephemeris: The original dataset states Swiss Ephemeris, tropical geocentric ecliptic longitudes. Planetary positions are reproduced without recomputation here. The birth date is interpreted at 12:00 UTC when the actual time is unknown. Moon sign and Moon aspects can differ at the real birth time; a noon position is not a natal chart with a documented time.

Aspects: Sun–Mars, Sun–Jupiter, Mars–Saturn, Mars–Pluto and Jupiter–Saturn fields are retained exactly from the master CSV. Blank means no aspect recorded under the original algorithm, not that the planets have no angular relationship. Independent recalculation of orbs remains an audit task.

Data quality: The birth-date register includes source URLs and quality labels as supplied in the working dataset. Some entries use a generic tennis page rather than an athlete-specific birth record. No source URL is represented as newly verified merely because it appears in the appendix. Particular attention is needed for the 2026 winners and player-to-title reconciliation.

Comparison: Planetary frequencies in champions are descriptive. A statistical claim of overrepresentation would require a reference distribution (for example age- and cohort-matched births), suitable multiple-testing correction, and a clear predeclared comparison metric.

Publication status: EXTENDED RESEARCH APPENDIX — SOURCE AUDIT OPEN. This document solves the missing depth and tabular coverage, but does not silently turn the existing data into fully verified evidence.
