

OSCAR ASTROLOGY | 2000–2026

Analytical report and complete acting-nomination appendix. Based exclusively on the supplied research workbook.

540 nominations | 108 winning entries | 325 unique performers | 322 usable birth charts

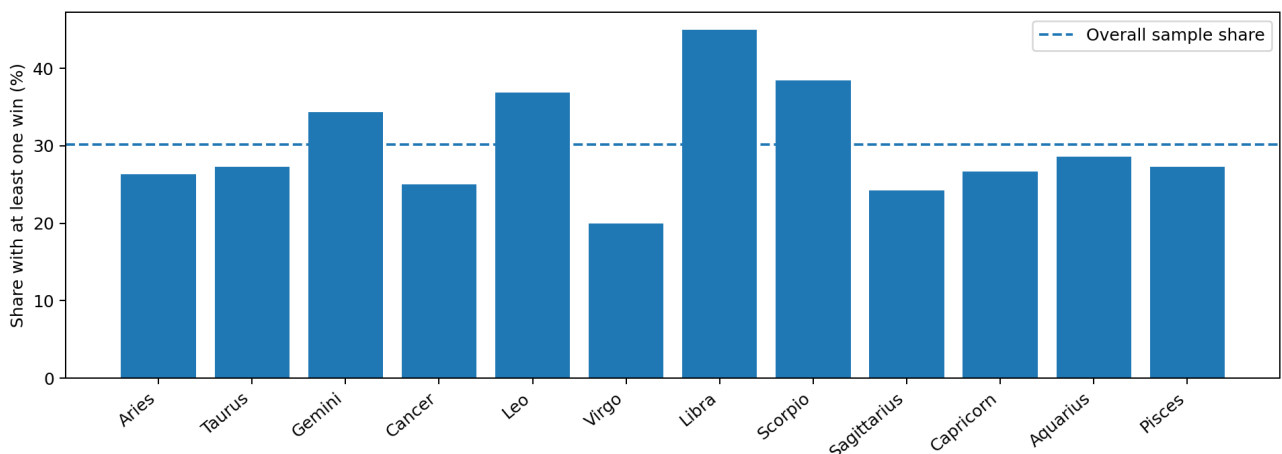

The 27 ceremony years cover four acting categories only. There are 97 distinct performers with at least one acting win during the period and 225 chart-eligible performers without a win. Three disputed or unavailable birth dates were excluded from astrology.

1. Sun signs: winners versus nonwinners

Each person is counted once, regardless of their number of nominations. Winner means at least one win in 2000–2026, not lifetime Oscar success.

2. Share of winners within each Sun sign

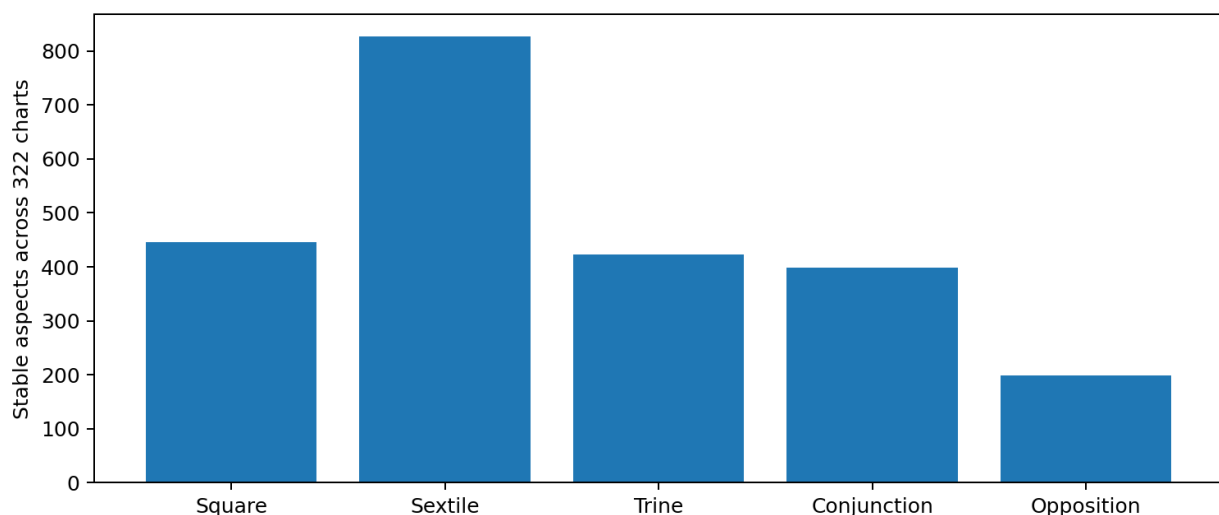

These percentages describe the nominated sample, not the probability that people born under a sign will win an Oscar. Small groups, nomination selection, cohort age, and repeated careers complicate interpretation.

Sun sign	Winners	No wins	Win share
Aries	10	28	26.3%

Sun sign	Winners	No wins	Win share
Taurus	6	16	27.3%
Gemini	11	21	34.4%
Cancer	5	15	25.0%
Leo	14	24	36.8%
Virgo	4	16	20.0%
Libra	9	11	45.0%
Scorpio	10	16	38.5%
Sagittarius	8	25	24.2%
Capricorn	8	22	26.7%
Aquarius	6	15	28.6%
Pisces	6	16	27.3%
Total	97	225	30.1%

3. Major planetary aspects

Stable aspects use the supplied 50-hour sensitivity window and a 5-degree orb. Counts are occurrences across planetary pairs, not numbers of distinct people. Sextiles are more numerous partly because many planetary pairs can contribute; this chart alone is not evidence of a success effect.

4. Methodology and limitations

The workbook uses Swiss Ephemeris 2.10.03, tropical geocentric positions, a 12:00 UTC reference on the recorded birth date, and a sensitivity check spanning 50 hours. It excludes the Moon, Ascendant, and houses because birth times are unknown. It includes Sun, Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto.

Three charts were excluded: Marina de Távira, Rosamund Pike, and Vanessa Kirby. The dataset describes its DOB evidence as cross-checked across OscarBase and biographical sources; this does not constitute independent civil-record authentication. Sign comparisons are descriptive and should not be treated as causal or statistically confirmed without additional testing.

5. Complete nomination register

The following appendix reproduces the nomination records from the supplied workbook. The full workbook remains the primary source for birth dates, planetary longitudes, aspects, and source URLs.

2000 — acting nominees
